

Model no. 1732/1733

QUIX END CLOSURES 100 BAR

According to

ISO 1167

ASTM D 1598

The internal pressure creep test is a test procedure for determining the strength of thermoplastic pipes to constant hydrostatic internal pressure at a constant ambient temperature. The samples are tested either for a specified period or until they fail. The test duration is subject to the tension generated by the internal pressure and the temperature.

SIMPLE AND SAFE OPERATION

- > Quick assembly thanks to proven end closure design
- > Simple and reliable venting directly at the sample

LASTING EFFICIENCY

- > High-quality unit components guarantee high reliability, a long service life and low maintenance costs
