

Model no. H3064

## HANSAW FOR PLASTIC PIPES

By the help of these professional pipe cutting machines the treatment of plastic pipes is an easy task.

### SIMPLE AND SAVE OPERATION

- > All saws distinguish themselves by their low weight
- > Heavy pipes can be treated at ground level
- > During operation the pipe cutter is stuck and does not have to be held or lead

### LASTING EFFICIENCY

- > Developed for professional use
- > Suitable for the portable use on-site and in the workshop

### STATE-OF-THE-ART TECHNOLOGY

- > Model H3064-0001 offers the option, to cut and bevel plastic pipes in one process and to get a perfect 15 degrees bevel at the same time
